

Briefings on Hospital Safety 2009 story index

Emergency management

- Battle-tested hospitals offer 12 pointers to beef up EOPs. May, p. 1.
- A drill reveals lessons on evacuating cancer patients. Nov., p. 6.
- Eight ways to sharpen emergency planning compliance. April, p. 5.
- Food plant explosion tests burn center's surge plan. Sept., p. 7.
- Guard your turf during community responses on-site. June, p. 6.
- Homeland security tool can help critique disaster drills. March, p. 4.
- Hudson River landing tests emergency response plans. April, p. 7.
- Know your morgue's limits, then prepare for an overflow. June, p. 10.
- Make a place for chaplains in your disaster prep plan. Oct., p. 1.
- Not quite a disaster, but more than a regular drill. July, p. 5.
- Nurses' union pact aids emergency preparedness efforts. May, p. 10.
- Report urges you to prep for more HSEEP influence. Aug., p. 1.
- Ring in 2009 with a better emergency preparedness plan. Jan., p. 5.
- Simple chemical mix-ups point to training opportunities. July, p. 4.
- Tip of the month: Emergency management scores back in full swing. Feb., p. 12.
- Tip of the month: Run evacuation scenarios with new AHRQ tool. April, p. 12.
- Tools you can use to assess emergency response risks. July, p. 9.
- Virtual world finds real-life use in emergency exercises. April, p. 10.

Environmental compliance

- Cut your energy bills with these award-winning ideas. Aug., p. 4.
- Double-check disinfectants—one-third fail EPA tests. Oct., p. 9.
- The EPA again extends the deadline on its oil spill rule. Aug., p. 7.
- The EPA proposes relaxed pharmaceutical waste rule. Feb., p. 5.
- Ethylene oxide sterilizer rule goes into effect. Aug., p. 7.
- Medical incinerator rule under reconsideration. Feb., p. 6.
- Squeeze more energy efficiency out of your buildings. Dec., p. 10.
- Tip of the month: \$533,000 settlement points out hazmat sore spots. Nov., p. 12.

- Tip of the month: Consider pollution control devices for EtO rules. May, p. 12.
- Tip of the month: Lower energy bills with these quick suggestions. Jan., p. 12.
- Use these 10 tips to tune up your RCRA compliance. Dec., p. 1.

Fire protection

- Designating responsibility is the first step in LS.01.01.01. March, p. 11.
- Don't put patients in egress halls when ED overcrowds. Sept., p. 3.
- Don't shrug off inadequate smoke barrier drawings. July, p. 3.
- Expect continued survey focus on life safety compliance. Oct., p. 4.
- New fire watch rule hinges on planned disruptions. Aug., p. 6.
- Roof fire offers insights to fine-tune your response plans. March, p. 8.
- Simple steps may help avoid life safety compliance woes. May, p. 4.

H1N1 swine flu

- Keep H1N1 in your sights, even if the threat seems gone. July, p. 6.
- Know when to open your emergency operations center. Nov., p. 1.
- Nationwide debate continues over mandatory flu shots. Dec., p. 5.
- Tip of the month: New fodder to help your upcoming flu shot efforts. Sept., p. 12.
- Tip of the month: New ways to communicate about outbreaks. July, p. 12.
- Tip of the month: Understand both sides of H1N1 PPE debate. Dec., p. 12.

Infection control

- Examine the risks and solutions related to Pseudomonas. Sept., p. 10.
- New document highlights your role in foiling infections. Feb., p. 8.

The Joint Commission

- Criticality scoring may be the biggest challenge in 2009. Feb., p. 1.
- Explore the outside standards cited within the EC chapter. Oct., p. 6.

Good news: You may already meet eleventh-hour EPs.

March, p. 10.

Grab EC success from new scoring, staff training ideas.

July, p. 1.

Internal document notes EC tracer is on survey agendas.

April, p. 9.

Life safety violations top most-cited standards list. May, p. 9.

Newly published FAQs shed light on common confusions.

June, p. 4.

Old EC rules may still be useful for today's compliance.

Dec., p. 4.

Risk assessments will remain in the security spotlight. Feb., p. 4.

Smoke-free campuses will be the norm soon—ideas abound for execution and enforcement. Nov., p. 4.

Survey monitor: Emergency management de-emphasized in

Texas survey. Dec., p. 8.

Survey monitor: Hospital finds life safety, disaster prep reviews helpful. Jan., p. 8.

Survey monitor: Hospital proves its 96-hour mettle in emergency plans. May, p. 8.

Survey monitor: HVA and other disaster preparations receive scrutiny. Aug., p. 8.

Survey monitor: Surveyors zoom in on testing and a locked egress door. Nov., p. 8.

Surveyors now note deficiencies fixed during Joint Commission visits. Oct., p. 5.

Medical equipment

Educate employees about the risks of using robotics. Nov., p. 10.

Keep new technology leashed until you learn its behavior.

May, p. 5.

Tip of the month: Joint Commission issues new sterilizer guidance. Oct., p. 12.

Medical flights

Chances may be growing for more medical flight rules.

April, p. 1.

FAA intends to publish new medical flight regulation. July, p. 7.

OSHA compliance

Agency recognizes 18-inch sprinkler rule for storage. April, p. 6.

Although not a regulation, ANSI Z358.1 wields influence.

Sept., p. 4.

Bloodborne remains No. 1, but asbestos jump is notable.

March, p. 6.

OSHA info about N95s, tap water, and IT workers. June, p. 9.

Safe patient handling is on your regulatory horizon. Sept., p. 1.

Tip of the month: Address hazards of long shifts during disasters.

June, p. 12.

Tip of the month: Pay attention to OSHA's re-emphasized PPE rule. March, p. 12.

Tip of the month: Tune up EtO safety with new OSHA guide.

Aug., p. 12.

Security

Avoid violence in the emergency department. Jan. insert.

Computer forensics and information security: Prevent all kinds of theft. Dec. insert.

Drill for scenarios in which someone brandishes a gun.

March, p. 1.

Eight steps to protect patients with dementia. April insert.

Forensic nurses learn to help solve crimes. Oct. insert.

Forensic patients pose major security risks. Feb. insert.

HVAC system allegedly hacked by security officer. Sept., p. 9.

Lessons learned, when the unimaginable happens. June insert.

Local incident prompts hospital to improve active shooter policy. Nov. insert.

Outsourcing your security. Sept. insert.

Prepare security officers for emergencies involving hazardous materials. May insert.

Prevent pharmacy violence. July insert.

Surviving security budget cuts in a recession. Aug. insert.

The weapons dilemma: Should you arm security? March insert.

Workplace health and safety

Keep on top of safety issues with UV units in ventilation.

Feb., p. 7.

Laundry inspection standards offer you best practices. Aug., p. 10.

A new breed of safety fair focuses on data-based trends.

Dec., p. 6.

Nine cost-cutting pointers for belt-tightened times. June, p. 1.

NIOSH questions one method of UV infection control. Oct., p. 10.

Reduce workplace stress by pooling hospital resources.

Feb., p. 10.

There is a familiar feel to DNV's safety standards. Jan., p. 1.

Think broadly about who faces toxic drug exposure. July, p. 10. ■
